LAOWA FF_{II} 15mm F2.0 D-Dreamer

使用手册
Instruction Manual

LAOWA 老蛙

本公司保留更改产品设计与规格的权利，届时恕不另行通知；
本公司保留对此《使用说明》的最终解释权。

Please note we reserve the right to change our product's
design and specifications at any time without notice and
to the final interpretation of the *Instruction Manual*.

前言

真诚地感谢您选购LAOWA老蛙FF II 15mm F2.0 D-Dreamer无反全画幅相机镜头。为了让您充分理解本产品的使用方法和注意事项，请您在使用前仔细阅读本说明书。

△ 为了操作上的安全，使用本产品前请务必详细阅读使用手册与注意事项，并将手册放在需要时容易取得的地方。如遇到不能解决的问题请通过售后电话获取技术支持。

主要特色

- LAOWA老蛙 FF 15mm F2.0 D-Dreamer镜头针对无反全画幅相机设计，可以拍摄全画幅110°超广角视野。
- 镜头采用了2枚双面非球面玻璃，具备了高性能、近似零畸变、小巧轻便的特色和优势。
- 镜头的机械结构全部采用金属部件，确保了镜头的组装精度和耐用性。
- 镜头体积小巧，仅约500g的重量，节省了背包空间，减轻了使用者的负担。
- 镜头每块镜片均采用低反射多层镀膜，尽可能的消除了鬼影和眩光，且前端镜片采用蛙眼仿生镀膜FEC(Frog Eye Coating)，使水滴、赃物不易附着。
- 为解决超广角大光圈带来的色散问题，此镜头采用了3枚超低色散镜片(ED Glass)，有效的降低了色散像差。

注意事项

△ 安全注意事项

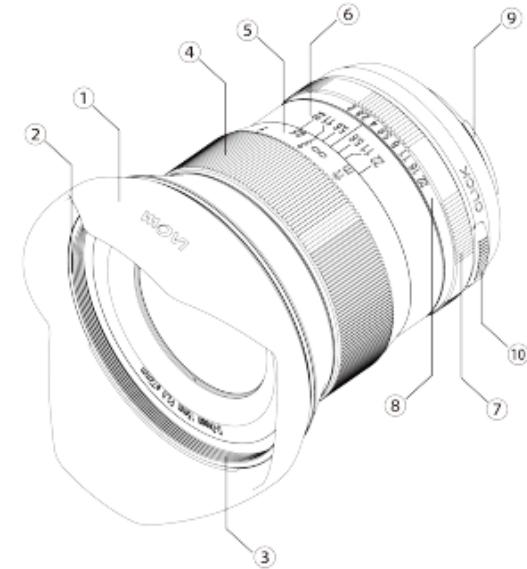

- 切勿自行拆解、修改或改装。当产品由于外力原因破损，切勿触碰外露部分或破损边缘处。
- 切勿放置于直射阳光下、封闭车辆中或其余高温处，否则过高的温度会使镜片和其他部件产生伸缩变形。
- 不使用镜头时，请将镜头前盖盖上或置于没有阳光照射处。凸透镜反射出的光线可能会聚集在附近物体上，导致发生火灾。
- 在逆光拍摄时，切勿将太阳置于画面中心，应该使太阳充分偏离画角，否则阳光会在相机内部聚集并导致火灾或灼伤眼睛。
- 在使用相机内置闪光灯拍摄时，由于镜头本身会遮挡光线而产生渐晕，因此建议您使用外设闪光灯拍摄。

注意事项

■ 长期使用保养注意事项

- 避免触摸镜头表面，应用专用镜头布或气吹去除镜头表面的尘埃，不使用镜头时，应将镜头盖盖上。
- 使用镜头纸或镜头布清洁时,以螺旋的方式从中间向外擦拭镜头上的污垢以及指印。
- 镜头从寒冷的环境突然转移至温暖的环境时，镜头的外部以及内部镜片将会凝结水雾，所以在转移时应采取防潮保护措施。

各部件名称

- ①遮光罩 ②遮光罩安装标记 ③滤光镜安装螺纹 ④对焦环
⑤距离刻度 ⑥景深指示刻度 ⑦光圈环 ⑧光圈刻度
⑨镜头安装标记 ⑩光圈有级和无级切换开关

使用说明

■ 镜头安装

- 取下镜头后盖。将镜头卡口上的安装标记⑨对准相机座圈上的对应标记，随后将镜头插入机身座圈，根据所购买卡口的安装方向旋转镜头，直至咔嚓声锁紧镜头。安装时请不要用力过猛，以免导致卡口损伤。

■ 镜头拆卸

- 关机后按住相机上的镜头释放按钮，依照所购买卡口的安装方向反向旋转镜头，随后将镜头从座圈中拔出。
- 装上镜头后，请尝试旋转镜头确认是否已将其固定在相机上。
- 由于此为非CPU镜头，无法提供数据信息，所以请在相机内开启“无镜头释放快门”功能。

使用说明

■ 遮光罩装卸

- 将遮光罩上的安装标记②对准镜头上的遮光罩安装点，然后顺时针旋转遮光罩，直至锁紧末端为止。
- 如要拆卸遮光罩，按相反方向旋出即可。(示意图)
- 安装遮光罩可减少强光并保护镜头前部元件。
- 安装某些滤光镜后，您可能无法再使用遮光罩。
- 若不使用遮光罩时，可将遮光罩反向安装于镜头上。
- 利用闪光灯拍摄时。遮光罩可能遮挡住光线而造成影像上的渐晕现象。所以在使用相机闪光灯或使用亮度不够的外置闪光灯时,请拆卸遮光罩后再进行拍摄。

使用说明

■ 对焦

- 此款镜头是全手动对焦镜头，合焦时，缓慢旋转对焦环④，直至合焦。
- 不要过猛过快地旋转对焦环，避免用力过度损坏对焦环部件。
- 镜头上的距离刻度⑤与景深刻度⑥是出于指导目的。实际焦点与景深可能同刻度标记稍有不同。
- 如需要非常精确的对焦，请在固定好相机位置的情况下使用最大光圈对焦，对焦完成后再旋至所需要的光圈值。
- 为了对焦的方便性，请开启相机内的峰值对焦功能(视所使用相机功能而定)。

■ 光圈使用

- 光圈在镜头上调节，根据拍摄环境和与所需要的景深，转动光圈环⑦来选择对应的光圈。
- 可以调节转换开关⑩，切换转动光圈环时的有级或无级状态。
- 由于此镜头无CPU数据，所以暂时无法记录光圈参数。
- 由于光圈为手动调节，无法较好的使用快门优先模式，但可以使用光圈优先模式(测光准确度视相机型号而定)。

规格表

LAOWA老蛙FF 15mm F2.0 D-Dreamer	
画幅	全画幅
焦点距离	15mm
光圈	2.0
视场角	110°
镜头结构	9组12片 (含2枚非球面玻璃,3枚异常分散玻璃)
光阑叶片	5片
最近摄影距离 (物像距离)	15cm
最大放大倍率	0.25倍
合焦驱动方式	手动 (MF)
滤镜直径	Φ72mm
镜头尺寸 (长/直径)	约82mm×Φ77.2mm
重量 (不含罩子)	约500克
卡口	索尼FE卡口、佳能RF卡口、尼康Z卡口

Introduction

Thank you for choosing LAOWA FF_{II} 15mm F2.0 D-Dreamer mirrorless full frame lens. Totally understand the use method and precautions of this product.

Please read this manual carefully before using.

⚠️For operational safety, be sure to read the manual book and precautions carefully before using this product, and keep the manual in a place that is easily available when needed. If you encounter a problem that cannot be solved, please contact with our technical support.

Product Features

- LAOWA FF_{II} 15mm F2.0 D-Dreamer lens is designed for mirrorless full frame camera. It can shoot a full frame view of ultra-wide angle 110°.
- The lens uses two double-sided aspherical glasses, featuring advantages such as high performance, near zero distortion, compactness and lightweight.
- The mechanical structure of the lens is entirely made of metal parts, ensuring the assembly precision and durability of the lens.
- Small and compact, the lens is only about 500g in weight, thus it saves the space of the backpack and reduces the burden on the user.
- Each lens of the lens adopts low-reflection multi-layer coating to eliminate ghosting and glare as much as possible, and the front lens adopts Frog (Frog Eye Coating), which makes water droplets and dirt difficult to adhere to.
- In order to solve the dispersion problem caused by the ultra-wide-angle large aperture, this lens uses three ultra-low dispersion lenses (ED Glass), which effectively reduces the dispersion aberration.

Notes & Cautions

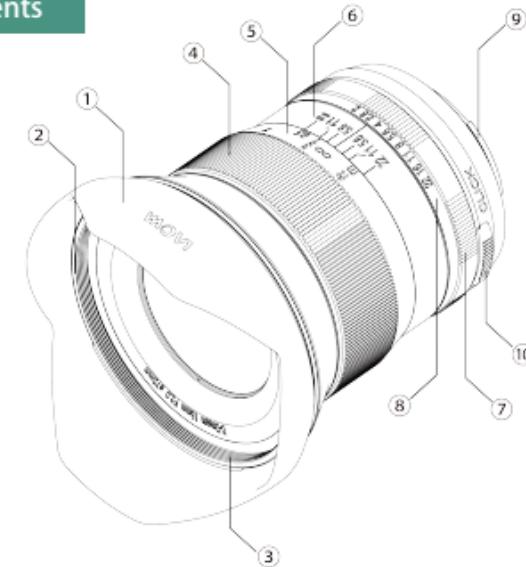

- ⚠ • Do not disassemble, modify and reassemble it by yourself. When the product is damaged due to external force, do not touch the exposed part or the damage edge.
- Do not place it in direct sunlight, in a closed vehicle, or at other high temperature environment, as excessive temperature can cause distortion of the lens and other components.
- When not using the lens, cover the lens front cover or place it in a place where there is no sunlight. Light reflected from the convex lens may collect on nearby objects and cause a fire.
- When shooting in backlighting, do not place the sun in the center of the screen. The sun should be sufficiently offset from the corners, otherwise the sun will collect inside the camera and cause fire or burns to the eyes.
- When shooting with the camera's built-in flash, it is recommended that you use the peripheral flash to shoot because the lens itself obscures the light and produces vegetating.

Notes & Cautions

■ Long-term Maintenance

- Avoid touching the lens surface, apply a special lens cloth or air-blowing to remove the dust on the lens surface. When not using the lens, cover the lens cover.
- When cleaning with lens paper or lens cloth, wipe the dirt and fingerprints on the lens from the center spirally.
- When the lens suddenly shifts from a cold environment to a warm environment, there will be water mist condensed on the outside of the lens and the internal lens, so moisture-proof actions should be taken when transferring.

Parts and Components

- ①Lens hood ②Lens hood installation mark ③Filter installation thread
④Focusing ring ⑤Distance scale ⑥Depth of field indicator scale ⑦Aperture ring
⑧Aperture scale ⑨Lens installation mark
⑩Aperture switch: switching between click-less and clicked aperture

Installation Instructions

■ Lens installation

- Remove the lens back cover. Align the installation mark⑨ on the lens mount with the corresponding mark on the camera seat, then insert the lens into the camera seat, and rotate the lens according to the mounting direction of the purchased mount until the lens is locked with a click. Do not use excessive force during installation to avoid damage to the mount.

■ Lens removal

- After turning off the camera, press and hold the lens release button on the camera, rotate the lens in the opposite direction according to the mounting direction of the purchased mount, and then pull the lens out of the seat.
- After installing the lens, try rotating the lens to see if it is fixed on the camera.
- Since this is a non-CPU lens, data information cannot be provided, so turn on the “Lens-free release shutter” function in the camera.

Installation Instructions

■ Lens hood installation and removal

- Align the installation mark ② on the hood with the hood installation point on the lens, then turn the hood clockwise until it locks the end.
- To remove the hood, unscrew it in the opposite direction. (Schematic diagram)
- Installing a hood reduces glare and protects the front components of the lens.
- After installing some filters, you may no longer be able to use the hood.
- If the hood is not used, the hood can be attached to the lens in reverse.
- When shooting with the flash, the hood may block light and cause vegetating on the image. Therefore, when using the camera flash or using an external flash with insufficient height, remove the hood before shooting.

Installation Instructions

Focus

- This lens is a full manual focus lens. When focusing, slowly rotate the focus ring ④ until it is in focus.
- Do not over-boom the focus ring too quickly to avoid excessive damage to the focus ring.
- The distance scale ⑤ and the depth of field ⑥ on the lens are for instructional purposes. The actual focus and depth of field may be slightly different from the tick mark.
- For very precise focus, when the camera position is fixed, use the maximum aperture to focus, and then rotate to the desired aperture value after the focus is complete.
- For the convenience of focusing, turn on the peak focus function in the camera (depending on the camera you use).

Aperture

- The aperture is adjusted on the lens, and the aperture ring ⑦ is rotated to select the corresponding aperture according to the shooting environment and the required depth of field.
- The switch ⑩ can be adjusted to switch between a clicked or click less state when the aperture ring is rotated.
- Since this lens has no CPU data, the aperture parameter cannot be recorded temporarily.
- Since the aperture is manually adjusted, the shutter priority mode cannot be used well, but the aperture priority mode can be used (the measuring accuracy depends on the camera model).

SPECIFICATIONS

LAOWA FF 15mm F2.0 D-Dreamer	
Frame Compatibility	Full Frame
Focal Length	15mm
Max. Aperture	f/2.0
Angle of View	110°
Lens Structure	12 elements in 9 groups (2 pcs of Aspherical Elements + 3 pcs of Extra-low Dispersion Elements)
Aperture Blades	5
Min. Focusing Distance	15cm
Max. Magnification	0.25X
Focusing	Manual Focus (MF)
Filter Thread	Φ72mm
Dimensions	82mm × Φ77.2mm
Weight	About 500g
Mounts	Sony FE、Canon RF、Nikon Z
